*** Inclusive of FVPL investments, FVOCI investments, advances & investments and investment properties.**

Note 1 Consolidated other operations also included the operations of A. Soriano Air Corporation, Anscor International, Inc. and Anscor Holdings, Inc.

- The Company and its subsidiaries' operating businesses are organized and managed separately according to the nature of the products or services offered.
- Holding company segment pertains to the operation of the parent company with earnings from income of its financial and operating investment assets.
- Other operations include real estate holding, aviation and management services.

2. Basis of Preparation and Changes in Accounting Policies and Disclosures

Basis of Preparation

The consolidated financial statements have been prepared on a historical cost basis, except for securities at FVPL) and FVOCI investments that have been measured at fair value. The consolidated financial statements are presented in Philippine pesos (Peso), which is the Company's functional and presentation currency. Amounts are presented to the nearest Thousand Peso unless otherwise stated.

Statement of Compliance

The consolidated financial statements of the Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRS).

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2023. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

Adoption of these new standards did not have an impact on the consolidated financial statements of the Group.

- Amendments to PFRS 3, *Reference to the Conceptual Framework*

The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements. The amendments added an exception to the recognition principle of PFRS 3, Business Combinations to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of PAS 37, Provisions, Contingent Liabilities and Contingent Assets or Philippine-IFRIC 21, Levies, if incurred separately.

At the same time, the amendments add a new paragraph to PFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

- Amendments to PAS 16, *Property, Plant and Equipment: Proceeds before Intended Use*

The amendments prohibit entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognizes the proceeds from selling such items, and the costs of producing those items, in profit or loss.

- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*

The amendments specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making. The amendments apply a “directly related cost approach”. The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

- Annual Improvements to PFRSs 2018-2020 Cycle

- Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*

The amendment permits a subsidiary that elects to apply paragraph D16(a) of PFRS 1 to measure cumulative translation differences using the amounts reported in the parent’s consolidated financial statements, based on the parent’s date of transition to PFRS, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of PFRS 1.

- Amendments to PFRS 9, *Financial Instruments, Fees in the ‘10 per cent’ test for derecognition of financial liabilities*

The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other’s behalf.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2023

- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

The amendments provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies, and
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

The amendments to the Practice Statement provide non-mandatory guidance. Meanwhile, the amendments to PAS 1 are effective for annual periods beginning on or after January 1, 2023. Early application is permitted as long as this fact is disclosed.

- Amendments to PAS 8, *Definition of Accounting Estimates*

The amendments introduce a new definition of accounting estimates and clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, the amendments clarify that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors.

An entity applies the amendments to changes in accounting policies and changes in accounting estimates that occur on or after January 1, 2023 with earlier adoption permitted. The amendments are not expected to have a material impact on the Group.

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*

The amendments narrow the scope of the initial recognition exception under PAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments also clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognized in the financial statements (and interest expense) or to the related asset component (and interest expense).

An entity applies the amendments to transactions that occur on or after the beginning of the earliest comparative period presented for annual reporting periods on or after January 1, 2023.

Effective beginning on or after January 1, 2024

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*

The amendments clarify:

- That only covenants with which an entity must comply on or before reporting date will affect a liability's classification as current or non-current.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively.

- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

The amendments specify how a seller-lessee measures the lease liability arising in a sale and leaseback transaction in a way that it does not recognize any amount of the gain or loss that relates to the right of use retained.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively. Earlier adoption is permitted and that fact must be disclosed.

Effective beginning on or after January 1, 2025

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

PFRS 17 is effective for reporting periods beginning on or after January 1, 2025, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial and Sustainability Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the IASB completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

3. Summary of Significant Accounting and Financial Reporting Policies

Basis of Consolidation

The consolidated financial statements of the Group comprise the financial statements of the Company and the following wholly-owned and majority-owned subsidiaries as at September 30, 2023 and December 31, 2022:

	Nature of Business	Percentage of Ownership	
		2023	2022
A. Soriano Air Corporation	Services/Rental	100	100
Pamalican Island Holdings, Inc.	Holding	62	62
Island Aviation, Inc.	Air Transport	62	62
Anscor Consolidated Corporation	Holding	100	100
Anscor Holdings (formerly Goldenhall Corp.)	Real Estate Holding	100	100
Akapulko Holdings, Inc.	Real Estate Holding	100	100
Lakeroad Corp.	Real Estate Holding	100	100
Mainroad Corp.	Real Estate Holding	100	100
Makatwiran Holdings, Inc.	Real Estate Holding	100	100
Makisig Holdings, Inc.	Real Estate Holding	100	100
Malikhain Holdings, Inc.	Real Estate Holding	100	100
Mountainridge Corp.	Real Estate Holding	100	100
Rollingview Corp.	Real Estate Holding	100	100
Timbercrest Corp.	Real Estate Holding	100	100
Sutton Place Holdings, Inc.	Holding	100	100
Summerside Corp.	Holding	100	40
Anscor International, Inc. (AI)	Holding	100	100
IQ Healthcare Investments Limited (IQHIL)	Holding	100	100
IQ Healthcare Professional Connection, LLC (IQHPC)	Inactive	93	93
Phelps Dodge International Philippines, Inc.	Holding	97	100
Minuet Realty Corporation	Landholding	97	100
Phelps Dodge Philippines Energy Products Corporation	Wire Manufacturing	97	100
PD Energy International Corporation	Wire Manufacturing	97	100
AFC Agribusiness Corporation	Real Estate Holding	81	81
Seven Seas Resorts and Leisure, Inc.	Villa Project Development	62	62
Pamalican Resort, Inc.	Resort Operations	62	62
Pamalican Utilities, Inc.	Utility Company	62	62

Except for AI and its subsidiaries, the above companies are all based in the Philippines. The principal business location of AI and IQHIL is in the British Virgin Islands (BVI), while IQHPC is based in the United States of America (USA).

Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins from the date of acquisition, being the date on which control is transferred to the Group and continue to be consolidated until the date that such control ceases. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Noncontrolling interests represent a portion of profit or loss and net assets of subsidiaries not held by the Group, directly or indirectly, and are presented separately in the consolidated statement of comprehensive income and within the equity section in the consolidated balance sheet and consolidated statement of changes in equity, separately from Company's equity.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the noncontrolling interests, even if this results in the noncontrolling interests having a deficit balance. Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary
- Derecognizes the carrying amount of any noncontrolling interests
- Derecognizes the cumulative translation differences recorded in equity
- Recognizes the fair value of the consideration received
- Recognizes the fair value of any investment retained
- Recognizes any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities

In 2008, Sutton acquired an additional 32% interest in CGI, increasing its ownership to 93%. The excess of the consideration over the book value of the interest acquired was taken to "Equity Reserve on Acquisition of Noncontrolling Interest" in the consolidated balance sheet.

Current Versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated statement of financial position based on current/noncurrent classification.

An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as noncurrent.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities, respectively.

Investments in Associates

Associates are entities over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies. Investments in associates are accounted for

under the equity method of accounting in the consolidated financial statements and are initially recognized at cost. On acquisition of investment in an associate, any difference between the cost of the investment and the entity's share of the net fair value of the investee's identifiable assets and liabilities is accounted for as goodwill. Any excess of the entity's share of the net fair value of the investee's identifiable assets and liabilities over the cost of the investment is included as income in the determination of the entity's share of the associate's profit or loss in the period in which the investment is acquired. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortized nor individually tested for impairment. After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in associates. At each reporting date, the Group determines whether there is objective evidence that the investment in associate is impaired. If there are such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value.

The Group's share of its associates' post-acquisition profits or losses is recognized in the consolidated statement of income, and its share of post-acquisition movements in the associates' equity reserves is recognized directly in equity. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the associate, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity.

Unrealized gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the associate. Unrealized losses are also eliminated, unless the transaction provides evidence of an impairment of the assets transferred. The reporting dates of the associates of the Group are identical and the associates' accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

The Group determines at the end of each reporting period whether there is any evidence that the investments in associates are impaired. If this is the case, the amount of impairment is calculated as the difference between the carrying amount of the investments and their recoverable amount.

Upon loss of significant influence over the associate, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in consolidated profit or loss.

The following are the Group's associates:

		Percentage of Ownership	
	Nature of Business	2023	2022
Associates			
Prople Limited	Business Process Outsourcing	32	32
Vicinetum Holdings, Inc. (VHI)	Holding	32	32
Fremont Holdings, Inc. (FHI)	Real Estate Holding	25	25
ATRAM Investment Management Partners Corp (AIMP)	Asset Management	20	20

The principal business location of AIMP, VHI and FHI is the Philippines. Prople Limited is based in Hong Kong.

Business Combinations and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any noncontrolling interests in the acquiree. For each business combination, the Group elects whether to measure the noncontrolling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PAS 39 is measured at fair value with changes in fair value recognized either in profit or loss or as a change to OCI. If the contingent consideration is not within the scope of PAS 39, it is measured in accordance with the appropriate PFRS. Contingent consideration that is classified as equity is not re-measured and subsequent settlement is accounted for within equity.

Goodwill acquired in a business combination is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for noncontrolling interests, and any previous interest held, over the net identifiable assets acquired and

liabilities assumed. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in profit or loss.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit or a group of cash-generating units and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Asset Acquisitions

If the assets acquired and liabilities assumed in an acquisition transaction do not constitute a business, the transaction is accounted for as an asset acquisition. The Group identifies and recognizes the individual identifiable assets acquired and liabilities assumed. The acquisition cost is allocated to the individual identifiable assets and liabilities on the basis of their relative fair values at the date of purchase. Such a transaction or event does not give rise to goodwill. Where the Group acquires a controlling interest in an entity that is not a business, but obtains less than 100% of the entity, after it has allocated the cost to the individual assets acquired, it notionally grosses up those assets and recognizes the difference as non-controlling interests.

Disposal Group and Discontinued Operations

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations;
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to resale

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the consolidated statement of income.

Foreign Currency Translation

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are initially recorded in Peso based on the exchange rate recorded at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the closing exchange rate at the end of reporting period. All differences are taken to the consolidated statement of income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the closing exchange rates at the date when the fair value was determined. Foreign exchange gains and losses relating to FVOCI equity instruments are presented under other comprehensive income.

Financial statements of consolidated foreign subsidiaries which are considered foreign entities are translated into the presentation currency of the Group (Peso) at the closing exchange rate at end of reporting period and their statements of income are translated using the monthly weighted average exchange rates for the year. The exchange differences arising from the translation are taken directly to a separate component of equity (under cumulative translation adjustment). On disposal of a foreign entity, the deferred cumulative amount recognized in equity relating to that particular foreign operation is recognized in the consolidated statement of income.

Fair Value Measurement

The Group measures financial assets (such as FVPL and FVOCI investments) at fair value at each balance sheet date. Also, fair values of financial instruments measured at amortized cost and of investment properties are disclosed.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring fair value measurement, such as unquoted FVOCI financial assets, and for non-recurring fair value measurement.

External valuers are involved for valuation of significant assets, such as investment properties. Involvement of external valuers is decided upon annually by management. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Management decides, after discussions with the Group's external valuers, which valuation techniques and inputs to use for each case.

At each reporting date, management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Initial recognition and measurement of financial instruments

At initial recognition, financial assets are classified as, and measured at amortized cost, FVOCI, and FVPL. Financial liabilities are classified and measured as financial liabilities at FVPL and amortized cost.

Classification of financial instruments

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under PFRS 15.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets at FVPL.

As of September 30, 2023 and December 31, 2022, the Group has the following categories of financial assets and financial liabilities:

(a) Financial assets and financial liabilities at FVPL

This category includes financial assets and financial liabilities held for trading and financial assets and financial liabilities designated upon initial recognition as at FVPL. Financial assets and financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term.

Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVPL, irrespective of the business model.

Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, as described above, debt instruments may be designated at FVPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets or financial liabilities classified in this category may be designated by management on initial recognition when the following criteria are met:

- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognizing gains or losses on them on a different basis; or
- The assets and liabilities are part of a group of financial assets, financial liabilities or both which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or

- The financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Derivatives recorded at FVPL

The Group enters into derivative contracts such as currency forwards. These derivative financial instruments are initially recorded at fair value and are subsequently remeasured at fair value at each reporting date. Any gains or losses arising from changes in fair values of derivatives (except those accounted for as accounting hedges) are taken directly to the consolidated profit or loss. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Group has certain derivatives that are embedded in host financial contracts, such as structured notes and debt investments and conversion. These embedded derivatives include calls and puts in debt investments and interest rate and conversion options, among others.

A derivative embedded in a hybrid contract, with a financial liability or nonfinancial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at FVPL. Embedded derivatives are measured at fair value with changes in fair value recognized in the consolidated profit or loss. Reassessment occurs only if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the FVPL category.

A derivative embedded within a hybrid contract containing a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as a financial asset at FVPL.

Embedded derivatives are measured at fair value with changes in fair value recognized in the consolidated profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the FVPL category.

Financial assets and financial liabilities at FVPL are recorded in the consolidated balance sheet at fair value. Changes in fair value are recorded in "Gain (loss) on increase (decrease) in market values of FVPL investments". Interest earned or incurred is recorded in interest income or expense, respectively, while dividend income is recorded as such according to the terms of the contract, or when the right of payment has been established.

As at September 30, 2023 and December 31, 2022, the Group has designated as FVPL all equity investments, money market papers, investments in bonds that have callable and other features, managed/hedged funds and derivatives. No financial liability at FVPL is outstanding as at September 30, 2023 and December 31, 2022.

(b) Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in the consolidated profit or loss when the asset is derecognized, modified or impaired.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization is included as interest income in the consolidated profit or loss. The losses arising from impairment of such financial assets are recognized as “Valuation allowances” account under “Other income (charges) - net” in the consolidated profit or loss.

Included under financial assets at amortized cost are cash in banks, short-term investments, trade receivables, interest receivable, advances to employees, receivables from villa owners, dividend receivable, notes receivable and other receivables.

(c) Financial assets at FVOCI (debt instruments)

The Group measures debt instruments at FVOCI if both of the following conditions are met:

- The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at FVOCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the consolidated profit or loss and computed in the same manner as financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI.

When the debt instrument is disposed of, the cumulative gain or loss previously recognized under OCI is transferred to profit or loss as “Gain (loss) on sale of FVOCI investments”. Where the Group holds more than one investment in the same security, cost of the disposed investment is determined on a weighted average cost basis. Interest earned on holding FVOCI investments are reported as interest income using the effective interest rate.

The Group classifies bonds held as FVOCI investments as current assets when the investments are expected to mature within 12 months after the reporting period.

As at September 30, 2023 and December 31, 2022, the Group's FVOCI investments include investments in bonds.

(d) Financial liabilities - loans and borrowings

All loans and borrowings are initially recognized at the fair value of the consideration received, less directly attributable transaction costs. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in the consolidated profit or loss when the liabilities are derecognized as well as through the amortization process.

Borrowings are classified as current liabilities unless these are expected to be settled within 12 months after the reporting date or the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

As at September 30, 2023 and December 31, 2022, included in this category are the Group's notes payable, accounts payable and accrued expenses, long-term debt and dividends payable.

Derecognition of Financial Assets and Financial Liabilities

Financial assets

A financial asset (or where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized or removed from the consolidated balance sheet where:

- The rights to receive cash flows from the asset have expired; or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification will result into the removal of the original liability and the recognition of a new liability and the difference in the respective carrying amounts is recognized in the consolidated profit or loss.

Impairment of Financial Assets

The Group recognizes an allowance for ECLs for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at FVOCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group's debt instruments at FVOCI comprise solely of top investment grade bonds that are graded by top credit rating agencies and, therefore, are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from the top credit rating agencies both to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs.

The Group considers a financial asset in default when contractual payments are 120 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows

"Day 1" Difference

Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a "Day 1" difference) in the consolidated profit or loss unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is recognized in the consolidated profit or loss only when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the "Day 1" difference.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements and the related assets and liabilities are presented gross in the consolidated balance sheet. The Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Group and all of the counterparties.

Revenue from Contracts with Customers

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group assesses its revenue arrangement against specific criteria in order to determine if it is acting as principal or agent. The Group has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

Sale of goods

Sale of goods, including villa lots, is recognized when the significant risks and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably.

Sale of real estate

Revenue of villa lots is recognized when the significant risks and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably.

Rendering of services

Management fees, air transport services, and other aviation-related activities are recognized when the services have been performed.

Revenue from rooms is recognized based on actual occupancy. Other ancillary services are recognized when the related services are rendered and/or facilities/amenities are used.

Interest

Interest income from bank deposits and investments in bonds are recognized as interest accrues based on the effective interest rate method.

Dividends

Dividend income is recognized when the shareholders' right to receive the payment is established.

Rental

Rental income is accounted for on a straight-line basis over the lease term.

Costs and Expenses

Costs and expenses are recognized in profit or loss when there is a decrease in future economic benefit related to a decrease in an asset, or an increase of a liability, that can be measured reliably. Costs and expenses include the cost of administering the business, and are expensed as incurred.

Cost of goods sold

The cost of goods sold is recognized as expense when the related goods are sold.

Cost of real estate sold

The cost of real estate sold includes the acquisition cost of the land determined based on average method and the actual construction and furnishing costs.

Costs of services rendered

Cost and expenses related to room services are charged to operations when incurred.

Selling, general and administrative expenses

All selling and general and administrative expenses are expensed as incurred.

Other Comprehensive Income

Other comprehensive income comprises of items of income and expense that are not recognized in consolidated profit or loss for the year in accordance with PFRS. Other comprehensive income of the Group pertains to gains and losses on remeasuring FVOCI investments, exchange differences on translating foreign operations and remeasurements comprising actuarial gains and losses on retirement plan assets and liabilities. In computing for the earnings available for dividend declaration and earnings per share, other comprehensive income is not considered.

Cash and Cash Equivalents

Cash includes cash on hand and with banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of change in value.

Restricted cash funds are recorded as other noncurrent assets unless the restriction is expected to be released at least 12 months after the reporting period.

Inventories

Inventories are valued at the lower of cost and net realizable value (NRV). Cost of aircraft spare parts and supplies is determined at purchase price using the first-in, first-out method while NRV is the estimated current replacement cost of such spare parts and supplies.

Cost of food and beverage inventories and operating supplies is determined using the moving average method. NRV of food and beverage inventories is the estimated selling price in the ordinary course of business, less the estimated cost of preparation and the estimated cost necessary to make the sale. NRV of operating supplies is the estimated current replacement cost.

Residential units held for sale include those costs incurred for the development and improvement of the properties. Its NRV is based on the available net selling price of similar residential units sold during the year.

Finished goods and work in process is determined at standard cost adjusted to actual cost, which includes direct materials, direct labor and applicable allocation of fixed and variable costs, determined using weighted average method. Raw materials, other materials, reels inventory and spare parts and supplies are determined at purchase price using weighted average method.

Prepayments

Prepayments include advance payments of various goods and services that are yet to be delivered and from which future economic benefits are expected to flow to the Group within the normal operating cycle or, within 12 months from the reporting date.

They are initially measured at the amount paid in advance by the Group for the purchase of goods and services and are subsequently decreased by the amount of expense incurred.

Property and Equipment

Depreciable properties, including buildings and improvements, leasehold improvements, machinery and other equipment, flight and ground equipment, furniture, fixtures and office equipment, and transportation equipment are stated at cost less accumulated depreciation and amortization, and any impairment in value. Land is stated at cost less any impairment in value. The initial cost of property and equipment comprises its purchase price, including import duties, taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property and equipment have been put into operations, such as repairs and maintenance, are normally charged to income in the period when the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally

assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment.

Property and equipment are written-off when either these are disposed of or when these are permanently withdrawn from use and there is no more future economic benefit expected from its use or disposal.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation and amortization and any impairment in value are removed from the accounts and any resulting gain or loss is credited to or charged against current operations.

Depreciation is computed on a straight-line method over the following estimated useful lives of the properties, except for aircraft engine which is computed based on flying hours.

Category	Number of Years
Buildings and improvements	10 - 30
Land improvements	25
Leasehold improvements*	5 - 20
Flight and ground equipment	5 - 25
Furniture, fixtures and office equipment	3 - 5
Transportation equipment	3 - 5

** or lease term, whichever is shorter*

The useful lives, depreciation and amortization method, and residual values are reviewed periodically to ensure that the periods and method of depreciation and amortization are consistent with the expected pattern of economic benefits from the use of property and equipment.

Construction in progress (CIP) is stated at cost. This includes cost of construction and other direct costs. CIP is not depreciated until such time the relevant assets are completed and put into operational use.

Property Development in Progress

Property development in progress includes the acquisition costs of raw lots and development costs incurred.

Property development in progress is carried at the lower of cost incurred and net realizable value. Net realizable value is the selling price in the ordinary course of business, less the estimated costs of completion and estimated costs necessary to make the sale.

Investment Properties

Investment properties are initially measured at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, the Group's investment properties are stated at cost, less accumulated depreciation and any accumulated impairment losses. Land is subsequently carried at cost less any impairment in value.

Expenditures incurred after the investment properties have been put into operation, such as repairs and maintenance costs, are normally charged to income in the period in which the costs are incurred. Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. If the property occupied by the Group as an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use. Investment properties are written-off when either these are disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of the investment property are recognized in the consolidated statement of income in the year of retirement or disposal.

Investment properties are written-off when either these are disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of the investment property are recognized in the consolidated statement of income in the year of retirement or disposal.

Impairment of Nonfinancial Assets

At each reporting date, the Group assesses whether there is any indication that its nonfinancial assets (namely, property and equipment and investment properties) may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Group makes a formal estimate of recoverable amount. Recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of the cash-generating unit to which it belongs. Where the carrying amount of an asset (or cash-generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written down to its recoverable amount. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit).

An impairment loss is charged to operations in the year in which it arises, unless the asset is carried at a revalued amount, in which case the impairment loss is charged to the revaluation increment of the said asset. An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation and amortization expense is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining life.

Goodwill

Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount of the cash-generating unit (or group of cash-generating units) to which goodwill has been allocated, an impairment loss is recognized immediately in the consolidated statement of income.

Impairment losses relating to goodwill cannot be reversed for subsequent increases in its recoverable amount in future periods. The Group performs its annual impairment test of goodwill as of December 31 of each year.

Other Noncurrent Assets and Other Noncurrent Liabilities

Other noncurrent assets represent restricted cash funds for future acquisition of specific property and equipment and for future villa operating requirements. A corresponding liability is recognized for these funds under other noncurrent liabilities.

Capital Stock

Capital stock represents the total par value of the shares issued.

Additional Paid-in Capital

Additional paid-in capital pertains to the amount paid in excess of the par value of the shares issued.

Retained Earnings

Retained earnings represent the cumulative balance of net income or loss, net of any dividend declared.

Unappropriated retained earnings represent that portion which is free and can be declared as dividends to stockholders, after adjustments for any unrealized items, which are considered not available for dividend declaration.

Appropriated retained earnings represent that portion which has been restricted and therefore is not available for any dividend declaration.

Cost of Shares Held by a Subsidiary

The Company's shares which are acquired and held by a subsidiary (treasury shares) are deducted from equity and accounted for at weighted average cost. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Company's shares. Any difference between the carrying amount and the consideration, if reissued, is recognized in additional paid-in capital.

Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- a. There is a change in contractual terms, other than a renewal or extension of the arrangement;
- b. A renewal option is exercised or extension granted, unless that term of the renewal or extension was initially included in the lease term;
- c. There is a change in the determination of whether fulfillment is dependent on a specified asset; or
- d. There is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios a, c or d above, and at the date of renewal or extension period for scenario b.

The Group as Lessee

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statement of income on a straight-line basis over the lease term.

The Group as Lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Borrowing Costs

Borrowing costs are generally expensed as incurred. Borrowing costs are capitalized if they are directly attributable to the acquisition or construction of a qualifying asset. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use.

Pension Benefits

The Group has a non-contributory defined benefit retirement plan.

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in profit or loss.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of income, net of any reimbursement. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense.

Contingent liabilities are not recognized in the consolidated financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognized but are disclosed in the notes to consolidated financial statements when an inflow of economic benefits is probable.

Income Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are those that have been enacted or substantively enacted as of end of the reporting period.

Deferred income tax

Deferred income tax is provided, using the balance sheet liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, including asset revaluations. Deferred income tax assets are recognized for deductible temporary differences, carry forward of unused tax credits from the excess of minimum corporate income tax (MCIT) over the regular corporate income tax, and unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable income will be available against which the deductible temporary differences and carry forward of unused tax credits from excess MCIT and unused NOLCO can be utilized. Deferred income tax, however, is not recognized on temporary differences that arise from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting income nor taxable income.

Deferred income tax liabilities are not provided on taxable temporary differences associated with investments in domestic subsidiaries. With respect to investments in foreign subsidiaries, deferred income tax liabilities are recognized except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each end of reporting period and reduced to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are re-assessed at each end of reporting period and are recognized to the extent that it has become probable that sufficient future taxable income will allow the deferred income tax assets to be recovered.

Deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are applicable to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of reporting period.

Current income tax and deferred income tax relating to items recognized directly in equity are also recognized in equity and not in the consolidated statement of income.

Deferred income tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and deferred income taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)

Input VAT is the 12% indirect tax paid by the Group in the course of the Group's trade or business on local purchase of goods or services, including lease or use of property, from a VAT-registered person. VAT on capital goods are spread evenly over the useful life or 60 months, whichever is shorter.

Output VAT pertains to the 12% tax due on the lease or exchange of taxable goods or properties or services by the Group.

For its VAT-registered activities, when VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the statement of financial position up to the extent of the recoverable amount.

For its non-VAT registered activities, the amount of VAT passed on from its purchases of goods or service is recognized as part of the cost of goods/asset acquired or as part of the expense item, as applicable.

Earnings Per Share

Basic earnings per share (EPS) is computed by dividing net income for the year by the weighted average number of common shares outstanding during the year after giving retroactive effect to stock dividends declared and stock rights exercised during the year, if any. The Company does not have potentially dilutive common shares as of September 30, 2023 and December 31, 2022.

Dividends on Common Shares

Dividends on common shares are recognized as a liability and deducted from equity when approved by the respective shareholders of the Company and subsidiaries. Dividends for the year that are approved after the end of reporting period are dealt with as an event after the end of reporting period.

Events After the Reporting Period

Post year-end events that provide additional information about the Group's position at the end of reporting period (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

4. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the consolidated financial statements in accordance with PFRSs requires the Group to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses, other comprehensive income (loss) and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on amounts recognized in the consolidated financial statements.

Determination of functional currency

The Company's functional currency was determined to be the Peso. It is the currency of the primary economic environment in which the Company operates.

Classification of financial instruments

The Group classifies a financial instrument, or its component parts, on initial recognition either as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the consolidated balance sheets.

Classification and measurement of financial assets depend on the result of the SPPI and business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve particular business objectives. In classifying the investments not held for trading as at September 30, 2023 and December 31, 2022, the Group made an irrevocable election at initial recognition to designate the instruments as FVPL investments.

Operating lease commitments - the Group as Lessee

The Group has entered into leases of office and commercial spaces. The Group has determined that all significant risks and rewards of ownership of these spaces remain with the lessors.

Assessment of control over the entities for consolidation

The Group has wholly owned, majority and minority-owned subsidiaries discussed in Note 3. Management concluded that the Group controls these majority and minority-owned subsidiaries arising from voting rights and, therefore, consolidates the entities in its consolidated financial statements.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation and uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Provision for expected credit losses of receivables

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by product type and customer type and rating).

The provision matrix is initially based on the Group's historically observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecasted economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults, the historical default rates are adjusted. At every reporting date, the historically observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historically observed default rates, forecasted economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecasted economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

For the advances to related parties, the Group uses judgment, based on the best available facts and circumstances, including but not limited to, assessment of the related parties' operating activities (active or dormant), business viability and overall capacity to pay, in providing reserve allowance against recorded receivable amounts. These reserves are re-evaluated and adjusted as additional information is received.

Valuation of unquoted FVPL equity investments

Valuation of unquoted equity investments is normally based on one of the following:

- recent arm's-length market transactions;
- current fair value of another instrument that is substantially the same;
- the expected cash flows discounted at current rates applicable for terms with similar terms and risk characteristics; or
- other valuation models.

The determination of the cash flows and discount factors for unquoted equity investments requires significant estimation. In valuing the Group's unquoted FVPL equity instruments at fair value in compliance with PFRS, management applied judgment in selecting the valuation technique and comparable companies and used assumptions in estimating future cash flows from its equity instruments considering the information available to the Group.

Impairment of FVOCI debt investments

For FVOCI debt investments, the Group assesses the counterparty's ability to comply with the contractual obligations to pay out principal and interest. Further, the Group assesses whether the credit risk on that financial instrument has increased significantly since initial recognition. The Group did not recognize impairment loss in 2019 and 2018.

Estimation of allowance for inventory and impairment losses

The Group estimates the allowance for inventory obsolescence and impairment losses related to inventories based on specifically identified inventory items. The amounts and timing of recorded expenses for any period would differ if the Group made different judgments or utilized different estimates. An increase in allowance for inventory and impairment losses would increase recorded expenses and decrease current assets.

Estimation of useful lives of the Group's property and equipment

The Group estimates the useful lives of property and equipment based on the period over which these assets are expected to be available for use. The estimated useful lives of these assets are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence, and legal or other limits on the use of the assets.

In addition, the estimation of the useful lives of these assets is based on collective assessment of internal technical evaluation and experience with similar assets. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Investments carried under the equity method

Investments carried under the equity method are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The Group's impairment test on investments carried at equity is based on value-in-use calculations that use a discounted cash flow model. The expected cash flows are estimated from the operations of the associates for the next four years as well as the terminal value at the end of fourth year. The recoverable amount is most sensitive to the discount rates used for the discounted cash flow model, as well as the expected future cash inflows, revenue growth rates and long-term growth rates used for extrapolation purposes.

Impairment of non-financial assets

(a) Property and equipment and investment properties

The Group assesses impairment on assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Group considers important which could trigger an impairment review include the following:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- significant negative industry or economic trends.

There is no impairment loss on property and equipment and investment properties.

(b) Goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value-in-use of the cash-generating units to which the goodwill is allocated. In assessing the recoverability of the Group's goodwill, management exercised significant judgments and used assumptions such as revenue growth rates, discount rates and long-term growth rates in estimating the value-in-use of these cash-generating units.

Recognition of deferred income tax assets

The Group reviews the carrying amounts of the deferred income tax assets at each end of the reporting period and reduces deferred income tax assets to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred income tax assets to be utilized. Significant management judgment is required to determine the amount of deferred income tax assets that can be recognized, based upon the likely timing and level of future taxable profits together with future tax planning strategies. However, there is no assurance that the Group will utilize all or part of the deferred income tax assets.

Determination of pension and other retirement benefits

The cost of defined benefit pension plans as well as the present value of the pension obligation is determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation. The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Provisions and contingencies

Judgment is exercised by management to distinguish between provisions and contingencies.

5. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise cash and cash equivalents, receivables, investments in debt instruments, quoted and unquoted equity securities, investments in mutual and hedge funds, and short-term and long-term bank loans. The Group's other financial instruments include accounts payable and dividends payable and amounts due to affiliates, which arose directly from operations.

The Company's investment objectives consist mainly of:

- a) maintaining a bond portfolio that earns adequate cash yields and,
- b) maintaining a stable equity portfolio that generates capital gains through a combination of long term strategic investments and short-term to medium-term hold type investment.

The main risks arising from the use of these financial instruments are credit risk, liquidity risk, interest rate risk, equity price risk, foreign currency risk, and copper price risk. These risks are monitored by the Company's Investment Committee (the Committee).

The Committee evaluates the performance of all investments and reviews fund allocation to determine the future strategy of the fund. The Committee is formed by the Company's Chairman, Vice Chairman, Chief Finance Officer, Corporate Development Officer and an independent consultant. These meetings occur at least every quarter. The BOD reviews and approves the Company's risk management policies. The Company's policies for managing each of these risks are summarized below.

Credit risk

The Group is exposed to credit risk primarily because of its investing and operating activities. Credit risk losses may occur as a result of either an individual, counterparty or issuer being unable to or unwilling to honor its contractual obligations. The Group is exposed to credit risk arising from default of the counterparties (i.e., foreign and local currency denominated debt instruments and receivables) to its financial assets. The Group does not have a counterparty that accounts for more than 10% of the consolidated revenue.

Credit risk management

In managing credit risk on these investments, capital preservation is paramount. The Group transacts only with recognized and creditworthy counterparties. Investments in bonds are invested in highly recommended, creditworthy debt instruments that provides satisfactory interest yield.

Credit quality per class of financial assets

For the Group's financial assets, credit quality is monitored and managed using internal credit ratings. Internal risk ratings are derived in accordance with the Group's rating policy.

The Group evaluates credit quality on the basis of the credit strength of the security and/or counterparty/ issuer. High grade financial assets reflect the investment grade quality of the investments and/or counterparty; reliability is thus assured. Standard grade assets are considered moderately realizable.

Liquidity risk

Liquidity risk is defined as the risk that the Group may not be able to settle or meet its obligations as they fall due. Aside from yielding good returns, the Group ensures investments have ample liquidity to finance operations and capital requirements. Short-term bank loans are secured to fill in temporary mismatch of funds for new investments.

Where applicable, long-term debt or equity are used for financing when the business requirement calls for it to ensure adequate liquidity in the subsidiaries and affiliates' operation.

The Group's approach to managing liquidity risk is to ensure that it will always have sufficient liquidity to meet its liabilities when they are due. This is done by primarily investing in highly liquid investments.

The Group's total financial liabilities due to be settled within one year include notes payable that management considers as working capital. Accounts payable and accrued expenses and dividends payable are expected to be settled using cash to be generated from operations and drawing from existing lines of credits or liquidity reserves.

Market risks

Market risk is defined as the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. It is the risk coming from adverse movements in factors that affect the market value of financial instruments of the Group. The Group is exposed primarily to the financial risks of changes in interest rates, equity price risk, price risk of mutual funds, and foreign currency risk.

Investments exposed to market risk are foreign and local currency denominated quoted debt instruments, foreign and local currency denominated equity instruments and mutual fund/hedge fund investments.

There has been no change to the Group's manner in managing and measuring the risk.

a. Interest rate risks

Cash flow interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Fair value interest rate risk

Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market interest rates. The Group accounts for its quoted debt instruments at fair value. Changes in benchmark interest rate will cause changes in the fair value of quoted debt instruments.

b. Equity price risk

Equity price risk is the risk that the fair values of equities decrease as a result of changes in the levels of the equity indices and the values of individual stock. The equity price risk exposure arises from the Group's investment in stock listed in the Philippine Stock Exchange (PSE).

The sensitivity analysis assumes that the stock's standard deviation on its historical returns for the past one year provides the basis for the range of reasonably possible changes in prices of the stock investments. In establishing the relative range of the stock investment returns, the Group also assumes a 99% confidence level.

c. Price risk of mutual funds

The Group is exposed to the risk of changes in the fund's net asset value (NAV) due to its market risk exposures.

d. Foreign currency risks

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rate. The Group's exposure arises primarily from investments in foreign currency denominated debt investments and equity securities.

The Company and a subsidiary's foreign exchange risk arises primarily from investments in foreign currency denominated debt and equity securities. To minimize income volatility due to exchange rate movements, liquid investments are held in a basket of currencies, including Philippine peso and other major currencies such as U.S. dollar, Euro and Japanese Yen. This also enables the Company and a subsidiary to access investment opportunities in those currencies. The Company occasionally engages in foreign currency forward contracts as a defensive measure against foreign currency volatility.

On borrowings, it is the Company's group-wide policy for its subsidiaries and associates where it has significant influence to minimize any foreign exchange risks. Thus, all borrowings whether short-term or long-term, in general, should be in Philippine peso. Any foreign currency borrowings may be engaged only if matched by the entities' corresponding currency revenue flows or by a foreign currency asset. As such, PRI, SSRLI and CGI can borrow in U.S. dollar as their revenues are dollar-based. It is also the policy of the Group to minimize any foreign exchange exposure in its management of payables. Any substantial exposure is covered by foreign exchange contracts, if necessary.

e. Copper price risk

The PDP Group uses copper rods in the manufacturing of its products. Copper rods component represents a significant portion of the cost of each unit produced.

Copper rods are priced based on the London Metal Exchange prices and are affected by the volatility in the price of metal in the world market.

The PDP Group's exposure to price risk on copper rod purchases is managed through back-to-back purchase of rods versus sales orders, average pricing on the firm orders like automobile wire products with long-term contracts, and obtaining orders from contractors with a fixed price or locked-in contracts with a specified period.

Capital Management

The primary objective of the Group's capital management is to ensure an adequate return to its shareholders and to maximize its value to its shareholders. In pursuance of this goal, the Group establishes an optimum risk return investment objective through a sound diversified investment portfolio and in ensuring a fair credit rating, the Group establishes prudent financial policies through appropriate capitalization ratios in its investments and maintain reasonable liquidity.

The Group monitors capital on the basis of the carrying amount of equity as presented on the face of the consolidated balance sheet.

No changes were made in the objectives, policies or process for the period ended September 30, 2023.

6. Financial Instruments

Fair Values of Financial Assets and Liabilities

The carrying amounts of cash and cash equivalents, receivables, notes payable, dividends payable and accounts payable and accrued expenses approximate their fair values due to the short-term maturity of these financial instruments.

The carrying values of long-term debt, which have floating rates with quarterly repricing, approximate their fair values.

FVPL and FVOCI investments are carried at fair value. The following methods and assumptions were used to estimate the fair values:

- FVPL quoted equity shares, investments in bonds, funds and equities, proprietary shares and others are derived from quoted market prices in active markets.

- FVOCI investments in bonds are derived from quoted market prices in active markets.
- FVPL investments in KSA shares are based on the discounted cash flow (DCF) model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, the discount rate, and growth rate. The probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these unquoted equity investments.
- FVPL investments in private equity funds are valued using the adjusted net asset method. The underlying investments under these private equity funds are carried at fair value. Other FVPL investments in unquoted equity shares are based on prices and other relevant information generated by market transactions involving identical and comparable assets, liabilities or a group of assets and liabilities, such as business. The valuation requires management to use market multiples derived from a set of comparables. Multiples might be in ranges with a difference multiple for each comparable. The selection of the appropriate multiple within the range requires judgement, considering qualitative and quantitative factors specific to the measurement.

The following tables provide the Group's fair value measurement hierarchy of its assets:

As at September 30, 2023:

		Fair value measurement using		
		Quoted prices in active Markets (Level 1)	Significant observable inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Total			
FVPL investments:				
Quoted equity shares	₱6,275,028	₱6,275,028	₱–	₱–
Unquoted equity shares	3,069,780	–	2,048,071	1,021,709
Funds and equities	2,353,576	–	2,353,576	–
Proprietary shares	615,927	–	615,927	–
Bonds and convertible note	209,169	209,169	–	–
Others	5,245	5,245	–	–
	12,528,725	6,489,442	5,017,574	1,021,709
FVOCI investments:				
Bonds and convertible note	55,779	55,779	–	–
	₱12,584,504	₱6,545,221	₱5,017,574	₱1,021,709

As of December 31, 2022

		Fair value measurement using		
		Quoted prices in active Markets (Level 1)	Significant observable inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Description of significant unobservable inputs to valuation of financial instruments classified under Level 3 (in millions):

2023 and 2022

	Valuation Technique	Significant unobservable inputs	Range	Sensitivity of input to fair value
KSA	DCF Model	Dividend payout is P100.7 million	0% to 5%	0% fair value of P649
		5% annual increase at the end of 2 nd year		5% fair value of P1,045
		Liquidity discount of 20%	10% to 30%	10%: fair value of P1,175 30% fair value of P914
		Cost of equity of 13.20%	12.20% to 14.20%	12.20%: fair value of P1,185 14.20% fair value of P936

An increase in the expected lease income of KSA would increase the dividend payout, which would lead to an increase in the fair value of the investment in KSA.

Reconciliation of fair value measurement of FVPL assets in unquoted equity shares (in millions):

	KSA
As at 1 January 2022	P1,021.7
Unrealized gain in profit or loss	–
As at 31 December 2022	1,021.7
Unrealized gain in profit or loss	–
As at 30 September 2023	P1,021.7

7. Financial Condition

There was no other significant change in the Company's Consolidated Balance Sheet as of September 30, 2023 versus December 31, 2022.

Cash and Cash Equivalents

The increase in cash and cash equivalents can be attributed to net cash generated from operating and financing activities, partially offset by cash used in investing activities.

(Please see attached consolidated cash flow statements for detailed analysis of cash movements on pages 6 and 7).

Fair Value Through Profit and Loss (FVPL) Investments

The increase in the account can be attributed to higher market value of local traded shares and foreign denominated investment in bonds, stocks and funds of P580.6 million and foreign exchange gain of P105.9 million, offset by net disposal of P204.6 million.

Receivables

The decrease in receivables was mainly due to collection of trade receivables by the wire manufacturing and the resort subsidiaries.

Inventories

The decrease is traced to finished goods sold by the wire manufacturing subsidiary and the spare parts and supplies utilized for nine months by the aviation and resort subsidiaries.

Prepayments

Increase in this account can be attributed mainly to prepaid expenses related to manufacturing, resort and aviation operations.

Other current assets

Movement in the account is mainly due to increase in the creditable withholding taxes of parent company related to management fees charged to the resort and manufacturing subsidiaries.

Fair value through other comprehensive income (FVOCI) investments

Net increase in this account amounted to P14.3 million due to net addition in investments of P10.1 million, increase in market value of the FVOCI investments of P2.0 million and foreign exchange gain of P2.2 million.

Notes Receivables

The increase was attributable to the P218.0 million advances by the Parent company to ATRAM Investment Management Partners Corporation (AIMP). The advances is a 3-year term convertible note with an annual interest of 8%.

Investments and Advances

The decrease was mainly due to the P27.5 million cash dividend received from AIMP offset by the share in the equity earnings of the associates amounting to P5.4 million.

Property and Equipment - net

The increase can be traced to net acquisition of property and equipment of P1.3 billion offset by depreciation amounting to P238.6 million, mainly attributable to purchase of two (2) new Twin Otter aircraft by the aviation subsidiary.

Right-of-Use-Assets

With the adoption of PFRS 16, Leases, the manufacturing and aviation subsidiaries as a lessee recognized asset representing the right to use the asset/property during the lease term. The decrease pertained to depreciation of the asset/property used.

Deposit to suppliers

Decrease in the account balance pertained to reclassification by the aviation subsidiary of the deposit to aircraft supplier to property and equipment.

Accounts Payable and Accrued Expenses

The decrease was mainly attributable to the payment of liabilities to the suppliers of the resort and wire manufacturing subsidiaries.

Dividends Payable

During the period, the Parent Company paid cash dividends of P0.50 per share to shareholders amounting to P585.8 million (net of share of Anscor Consolidated Corporation). Balance of P527.5 million as of September 30, 2023, represents accumulated cash dividend of stockholders with problematic addresses, which increased from P502.0 million as of December 31, 2022.

Lease Liability (current and noncurrent)

With the adoption of PFRS 16, Leases, the manufacturing and aviation subsidiary as a lessee recognized a liability for future lease payments.

Long-term Debt (noncurrent)

The long-term debt pertained to IAI's 10-year term loan. The loan proceed was used to purchase two (2) new aircraft of the aviation subsidiary.

Deferred Income Tax Liabilities

Movement in the account was mainly due to the deferred tax effect of unrealized increase in market value of FVPL investments and unrealized foreign exchange gain.

Retirement Benefits Payable

Decrease resulted from payment of contribution to the plan.

Other noncurrent liabilities

Movement in the account can be traced to the increase in fund to be used for future maintenance and capex requirements for the back of house facilities.

Cumulative Translation Adjustment (CTA)

This account includes translation adjustments of Anscor International, Inc., and IQHPC. CTA balance increased by P44.1 million, due to depreciation of Philippine peso vis-à-vis US dollar.

Unrealized valuation loss on FVOCI investments (equity portion)

Movement in the account is attributable to the realized loss from the decline in market values of FVOCI investments, mainly bonds, from January 1 to September 30, 2023.

Others

There were no commitments for major capital expenditures in 2023.

8. Results of Operation

Management is not aware of any known trends, events or uncertainties except for political and market uncertainties that may have material impact on the Company's recurring revenues and profits.

The following are the key performance indicators for the Parent Company (In thousand pesos except earnings per share and market price per share):

	Periods ended September 30	
	2023	2022
Revenues (excluding investment gains or losses)	1,586,558	1,328,559
Investment Gains (Loss)	403,114	(1,971,862)
Total Comprehensive Income	1,763,788	152,400
Earnings Per Share		
Net Income	0.70	0.06
Total Comprehensive Income	0.71	0.06
Market Price Per Share (PSE)	11.08	8.95

The discussions below were based on the consolidated results of the Company and its subsidiaries.

Revenues

This year's consolidated gross revenues of P9.5 billion slightly increased from last year's revenue of P9.2 billion. Revenue in the first nine months of 2022 included nonrecurring gain on sale of investment in AGP of P2.2 billion. Gain on increase in market value of FVPL investments and higher dividend and interest income were registered in 2023. Lower sales of PDP was offset by a significant increase in revenues of the resort subsidiary.

Cost of Goods Sold

Decrease in cost of goods sold was due to the lower sales volume of the wire manufacturing subsidiary.

Cost of Services Rendered

Increase in cost of services rendered was mainly due to higher occupancy rate of the resort subsidiary.

Operating Expenses

The Group reported an increase in consolidated operating expenses for nine months of 2023 due to higher overhead of the parent company (from bonus paid based on higher net income in 2022) and rise in operating expenses of the resort.

Foreign Exchange Gain

This can be traced to depreciation of the Philippine peso vs US dollar from dollar-denominated investments of the Group. Gain in 2023 was lower than 2022.

Interest Expense

The amount was higher in 2023 due to interest expense on the long-term loan of the aviation subsidiary.

Provision for income tax

The tax provision of the Group was higher than last year mainly due to deferred income tax of the parent company related to unrealized gain on increase in market value of its FVPL investments and unrealized foreign exchange gain. The previous year's credit balance of provision for income can be attributed to the Parent Company's unrealized loss from decline in market value of FVPL investments.

9. Cash Flows

Management has no knowledge of known trends, demands, commitments, events or uncertainties that will have a material impact on the Company's liquidity.

10. Financial information

- There is neither a change in composition of the registrant, no business combination nor any restructuring.
- There are no seasonality or cyclical trends in the business that would have material effect on the Company's result of operations and financial condition.
- There are no significant elements of income or loss that did not arise from the issuer's continuing operations.

In the interim period:

- No issuance or repayment of equity securities.
- The parent company has not repurchased its equity securities except for its 100%-owned subsidiary, Anscorcon which todate owns 1,272,429,761 shares of Anscor. No additional shares were purchased during nine months of 2023.
- No contingent assets or liabilities since the last annual balance sheet date.
- No material contingencies and any event or transactions that are material to the understanding of the operating results of the current interim period.
- No events that will trigger direct or contingent financial obligations that is material to the company, including any default or acceleration of an obligation.
- No material off-balance sheet transactions, arrangements, obligations (including contingent obligations) and other relationships of the company with unconsolidated entities of other persons created during the reporting period.
- There are no material events subsequent to the end of the interim period that have not been reflected in the financial statements for the interim.

11. Subsidiaries and Affiliates

Phelps Dodge Philippines (PDP)

The following are the key performance data for Phelps Dodge Philippines (In thousand pesos except volume):

	Periods Ended September 30	
	2023	2022
<i>Volume sold (MT)</i>	10,439	11,052
<i>Revenue</i>	7,302,198	7,790,249
<i>Net Income</i>	696,895	690,075

PDP Energy's sales were lower in 2023 as against 2022's revenues due to decline in volume sold, mainly from its dealers nationwide. Weakness in retail demand was experienced due to fewer construction activities.

PDP posted a net income of P696.9 million for 2023, slightly higher than the P690.1 million profit recorded last year.

Seven Seas' Amanpulo Resort ended up with an occupancy rate of 48.2% for the nine months of 2023, versus the average occupancy rate of 45.2% in 2022. Average room rate increased to P82,263 from last year's average of P65,063. Total hotel revenues amounted to P993.8 million, an increase from last year's revenues by 33.9%.

Seven Seas reported a consolidated net income of P127.5 million in 2023, higher by 62.2% from last year's profit of P78.6 million.

The key financial indicators of our major subsidiaries are the following:

PDP Energy and PDIPI

In Thousand Pesos except sales volume

	09/30/2023	09/30/2022
1. Volume	10,439	11,052
2. Revenue	7,302,198	7,790,249
3. Net income	696,895	690,075

Seven Seas Group

In Thousand Pesos

	09/30/2023	09/30/2022
1. Occupancy rate	48.2%	45.2%
2. Hotel revenue	993,786	742,116
3. Gross operating profit (GOP)	363,153	282,930
4. GOP ratio	36.5%	38.1%
5. Net income	127,457	78,598

Occupancy rate is based on actual room nights sold over available room nights on a 9 - month period. Hotel revenues include rooms, food and beverage and other ancillary services. GOP is total revenues less direct costs and GOP ratio is GOP over total hotel revenues.
